541 SERIES
CHLORINE ALARM MONITOR

APPLICATIONS
Designed for the continuous monitoring of chlorine (Cl₂) in ambient air at water treatment plants, chlorine production plants, commercial swimming pools, or any area in which chlorine is handled or stored.

FEATURES
• Stand-alone or remote sensor versions available
• Long-life electrochemical cell
• Fast response to the presence of chlorine in the air
• Instant warm-up, no wait
• Bright digital readout - no reading interpretation errors
• Easy use and calibrate
• Easy to maintain modular layout
• 4-20mA output signal for recording
• NEMA 12 dust-tight enclosure

OPTIONS
• Alarm with LED indicator, relay contact, and 'Sonalert' audible alarm with 'Acknowledge' button
• Up to four remote sensors
• Strobe light for alarm indication
• NEMA 4 or 4X weather-proof enclosures

CALIBRATION
• On chlorine-free air or nitrogen for Zero
• On analyzed calibration gas of Cl₂ in air for Span

DESCRIPTION

The Nova 541 Series chlorine alarm monitors are designed for the continuous detection of Cl\textsubscript{2} in ambient air. The Cl\textsubscript{2} sensor is capable of excursions over 100 PPM with no damage. The Cl\textsubscript{2} sensor is a disposable electrochemical type with an expected life of between 3-4 years. The sensor needs no warm-up time and is ready to go as soon as the monitor is turned on. Several versions are available as shown below.

MODELS

- 541D - one diffusion-type sensor in main cabinet
- 541DR1 - one diffusion sensor remote from main cabinet
- 541DR2 - two remote diffusion sensors
- 541DR3 - three remote diffusion sensors
- 541DR4 - four remote diffusion sensors
- 541P - built-in sample pump to draw in sample from another location
